PROFILE

Experience building web applications. With knowledge about user interfaces, testing, and debugging processes. Proficient in an assortment of technologies including Java, JavaScript, PHP and excellent experience of relational databases.

Able to work productively in a team in agile environments.

EMPLOYMENT HISTORY

Software Developer, SysCo Consultores de Sistemas

Nov 2019 — Present

I work building customer facing web based applications. I have been working with custom development with Java Spring and technologies such as JavaScript, Maven and use of relational databases (Oracle). I gained experience building web services RESTful and code collaboration in teams using GitHub and SVN.

Able to implement solutions to existing projects according to the needs of the product owner.

Web Development Intern, Mouse Lamp Technologies

Jul 2019 — Nov 2019

I created a website developed in PHP with Laravel framework and I used the technologies JavaScript, jQuery, AJAX, MySQL and GitHub. The website was develop for the sale of electronic products (e-commerce). Also has an administrative section for the control of products, inventories, orders and users.

Web Development Intern, Ministerio de Agricultura y Ganadería

Jul 2018 — Nov 2018

I worked with a team developing an activity management system and a reporting system in C#. We used ASP.NET Web Forms, Visual Studio Team Foundation Server and Microsoft SQL Server.
